# Presentation Slide Holder Page

Added by Xie, Tao, last edited by Xie, Tao on Oct 21, 2015

By midnight of the presentation day,

- Step 1. name your presentation slides as **the name indicated after the "review file name"** annotated in the end of the entry for the paper that you present.
- Step 2. upload your presentation slides as attachments in this wiki page, and then add **"[Slides]"** in **the end of the entry of the paper** that you present on [the main course schedule page](#) and add the URL to your slide attachment underlying "Slides".

Note that you can upload the slides before your presentation time so that you can use the desktop in the classroom to download the slides and present the slides for your presentation.
